Radiators made up of 13 sections and more are delivered in two or more batteries.

Wall mounted

Free standing

A – Height B – Width C – Distance between pipe centres D – Horizontal distance between mounting bracket centres

Structure of configuration code for water and dual fuel radiators

Product codes can be found in product data sheet tables. The codes provide some basic information about the product while a partially filled configuration code contains complementary information about the detailed specifications. When placing an order, product codes should include the fully completed configuration part. The configuration code part should be placed after the main product code. The main product code and configuration part will appear as shown in the example below:

Code structure

WGBRF064085

PRODUCT CODE
(located in the table for the product)
